² Does not include the management company fee of max. 0.05% p.a.

³ in favour of distribution agent

Strategy

The objective is to outperform through active management the FTSE Global Vanilla Convertible Bond Index, currency hedged against the share class currency, net of expenses. The fund invests globally in convertible bonds with both high convexity and bond or equity-like profiles. This allows return drivers across the convertible bond universe to be fully exploited in the portfolio. This allows for increased participation in rising equity markets without sacrificing the typical protection that convertible bonds offer in loss-making phases.

Cumulative Performance

Monthly 2025 and Cumulative

	Jan	Feb	Mar	Apr	May	Jun	July	Aug	Sept	Oct	Nov	Dec	3 Mth	6 Mth	1 Year

Key Figures	Fund	Benchmark
Delta	56.3%	46.6%
Equity Exposure	46.7%	37.8%
Effective Duration	1.6	1.7
Average rating	BBB-	BB+

Key Factors

- Global convertible bond portfolio
- Risk-reduced alternative to stocks
- Invests in the most promising stocks in the entire convertible bond universe
- Experienced team, comprising 6 convertible bond portfolio managers
- Foreign currency investments are hedged against the fluctuations of the fund's reference currency

Summary Risk Indicator (February 2025)

The Summary Risk Indicator (SRI) assumes you keep the product for a minimum of 5 years.

Past performance is not an indicator of future performance and current or future trends. The performance values refer to the net asset value and are calculated without the commission and costs incurred on issue, redemption or swapping (e.g. transaction and custody costs of the investor). The fund does not include the security of capital which is characteristic of a deposit with a bank or building society. The indications are based on figures denominated in the fund currency. If this currency is different from the currency of the country in which the investor is resident, the return may increase or decrease as a result of currency fluctuations.

FISCH Convertible Global Dynamic Fund

A subfund of the Fisch Umbrella Fund

LU2427025817 - Shareclass MD - 31 March 2025

Rewards

- Investors achieve capital gains when equity markets rise and benefit from the defensive characteristics of a bond investment when they decline.
- Active management of equity, interest-rate and credit risks through the use of derivatives, among other considerations.
- Active portfolio management takes into consideration the current economic situation, sector developments and issuer ratings.
- In-depth research into companies and broad portfolio diversification help mitigate risk.

Risks

- Changes in share prices, interest rates, credit quality and other factors can subject the fund to greater volatility than with traditional corporate bonds.
- The use of derivatives can generate additional risks (including counterparty risk)
- An increase in interest rates and the widening of credit spreads can lead to a decline in bond prices.
- Unit prices may fall below the level at which the investor acquired their holding.

Positioning

Top 10 Positions

Security	Maturity	Currency	Weight

Glossary

Duration: a risk indicator that measures the sensitivity of the price of a bond issue or a portfolio of bond issues to a change in interest rates. **Ongoing charge:** the ongoing charge is a measure of the annual expenses incurred by a fund and is expressed as a percentage. It allows an accurate comparison of the costs of funds from different companies to be made. **Sharpe ratio:** the Sharpe ratio (risk-adjusted performance) is generated by calculating the difference between the average annualised return and the risk-free return. The resulting figure is divided by the annualised standard deviation of the returns. The higher the Sharpe ratio, the better the fund performance in relation to the risk potential of its portfolio. **Tracking error:** the tracking error measures the divergence between the return of a fund in relation to its benchmark. **Volatility:** a risk indicator demonstrating the fluctuation range (for example of the price or return of a security or fund unit) over a defined period; volatility is most often calculated using standard deviation. The higher the volatility, the greater the fluctuation range. **Yield to worst:** lowest possible yield that can be received on a bond that fully operates within the terms of its contract without defaulting.

Disclaimer

This documentation is provided for marketing purposes and is not to be seen as investment research.

The information in this document has been compiled by Fisch Asset Management AG ("Fisch"), Bellerivestrasse 241, 8008 Zurich

FISCH UMBRELLA FUND is an investment company with variable capital in the form of a public limited company under Luxembourg law.

Universal-Investment-Luxembourg S.A., 15, rue de Flaxweiler, 6776 Grevenmacher, Luxembourg, www.universal-investment.com, is the Management Company of the Fund.

No liability is assumed for the correctness and accuracy of the details given. The value of the units and the return they generate can go down as well as up. They are affected by market volatility and by fluctuations in exchange rates. HISTORICAL PERFORMANCE IS NO GUARANTEE OF FUTURE PERFORMANCE. The values and returns indicated here do not consider the fees and costs which may be charged when subscribing, redeeming and/or switching units. As a subscription fee calculation example, if an investor invests EUR 1000 in a fund with a subscription fee of 5%, he will pay to his financial intermediary EUR 47.62 on his investment amount, resulting with a subscribed amount of EUR 952.38 in fund shares.

Nothing contained herein constitutes investment, legal, tax or other advice, nor is it to be solely relied on in making an investment or other decision.

The summary of investors rights is available at fam.ch under the heading legal notice, Cross Border Fund Distribution, at the bottom of the page.

Investments should only be made after a thorough reading of the current Prospectus, the current Key Information Document (PRIIP KID) and articles of association, the latest annual and semi-annual reports and after advice has been obtained from an independent finance and tax specialist. The currently valid documents are available at fundinfo.com.

Shares of the fund have not been registered under the US Securities Act of 1933, as amended (the «Securities Act») and the fund is not registered under the US Investment Company Act of 1940, as amended (the «Company Act»). Accordingly, such shares may not be offered, sold or distributed in the United States or to US persons unless an exemption from registration under the Securities Act and the Company Act is available. In particular, this document may not be made available, handed over or distributed in the US or to US persons.

The Prospectus, the Key Information Document (PRIIP KID), the Articles of Incorporation, the annual and semi-annual reports are available for all jurisdictions from the Management Company or on the internet at fundinfo.com.

The asset manager may decide to terminate the arrangements made for the marketing of the Fund or compartments of the Fund in any given country at any time.
